Welcome to Language Communicator:

{

      note: if you are unable to access the information just logout and login again into the interface navigation bar at the side can be used to redirect in between the projects page and you can logout of the interface using the logout option

}

1.Access the interface through login page where you will enter your USERNAME and PASSWORD which will be mentioned in your respective mails

2.After successful login you will be directed to home page where you will be able to see all the projects that are uploaded by admins

3.Select on the projects that you are assigned and start working on them respectively

Based on the project user clicked on will be redirected to the screen where chapters will be shown that are in that particular project

Click on chapters , then you will be directed to the USR annotation tool

i.Chapter tab--- in this the content that is in the chapter will be displayed in form of running text

ii.Segment-tab ---- we display the content in segments
in this tab you can add or delete subsegments based on your requirements, for a single page we display max three segments, use the arrow keys to navigate to next and previous pages

iii.Lexico Conceptual tab----we display the conceptual information in this

click on any subsegment first to configure
a.Finalize the concept definition based on the subsegment that you clicked on
b.Add or Delete columns using the three dots which are given in the index row for each cell
c.Once done finalize the concept defintion by using finalize concept definition button

iv.Construction tab – display the information once the lexico conceptual defintion is completed

click on any subsegment to configure
a.Guide lines button which lets user to access the USR_GUIDELINES
b.Based on your understanding modify the CxN index and Component Type
c.Finalize the subsegments construction using the finalize construction button

v.Relational tab ---- we display all the relational information for the selected subsegment

click on any subsegment to configure
a.isMain check box can be used to modify the main verb of the selected subsegment. Chec on any tic box its , head index will be zero and relation type will become main. You need to adjust other indexes based on the IsMain relation
b.Head index : you can select the options from the dropdown based on the selected subsegment
c.Relation Type: you can modify the relation type from the options that are in the dropdown
d.Once done finalize the relation by using the Finalize dependency relation button
